

# K4<sup>+</sup>

**For maximum cost-efficiency.**

**Windegger**

# K4+

## Cost-effective

Our K4+ is a **cost-efficient general-purpose platform** for your family business. It is compact, agile and functional, and can support you **all year round** in your work: tree pruning or thinning by hand, ensuring that harvesting is completed comfortably, quickly and with maximum care.

## Comfortable

The K4+ has a unique **patented harvesting system**. The picking baskets for the upper areas are automatically lowered and emptied into the crates from above. This means that **up to five persons can comfortably pick fruit at the same time using the K4+ in both the upper and lower ranges**. The empty picking crates are either distributed separately along the rows, or up to five crates can be carried by the machine during harvesting.

## Practical

Easily mountable **booster batteries** double the autonomy when working. The K4+ general-purpose platform can be transported directly using the tractor hoist or with a stacker when harvesting.

## Diversifiable

The K4+ is fitted with all-wheel drive. It is available in the "classic" model for level terrain and "alpin" with **automatic slope compensation** (lateral and longitudinal). For your safety all Windegger machines including the K4+ are examined independently and are certified according to current **European Union regulations**.

## Use the benefits:

- ✓ Compact, manoeuvrable and maintenance-free lifting platform
- ✓ Automatic crate conveyor system
- ✓ New, optimised crate-conveyor system

### Technical data

- ✓ All-wheel drive with two electric motors, each rated 900 W
- ✓ Two tubular batteries, 12 V/135 Ah
- ✓ low current consumption thanks to low-loss transmissions
- ✓ Outer wheel width: 1.57 m
- ✓ Platform length: 0.93 m
- ✓ Platform width: 1.2-2.6 m extendable
- ✓ Platform height: 1.1-1.7 m electrically adjustable
- ✓ Driving incline: 8% (classic), 40% (alpin)
- ✓ Sideways inclination: 8% (classic), 30% (alpin)
- ✓ Weight: approx. 660 kg
